Disclosure and Consent –

I _____ voluntarily request the _____ minimally invasive procedure.

I voluntarily consent and authorize that this minimally invasive procedure to be performed by _____

I hereby release this clinic, its staff, and any other participating health care providers from any and all

liability for any adverse effects that may result from this treatment and related procedures.

For the purposes of accurate record keeping in connection with the care and treatment which I am

receiving and will subsequently receive from this clinic, I, the undersigned, consent to have this clinic's staff take before, during, and after treatment close-up photographs of the involved area (s)

and the anatomical region surrounding the involved area (s). These photographs shall be used for medical records and shall be treated with the same confidentiality as the remainder of my record at this clinic.

I recognize that this minimally invasive procedure is not an exact science and I acknowledge that no

guarantees or assurances have been made to me as to the result or cure. There are risks related to the performance of these procedures. I understand and acknowledge that the risks that may occur in connection with this particular procedure may include the following:

- Infection – Albeit rare, infection is a possibility any time a procedure is performed. I acknowledge and understand that although rare, it is possible for an infection to become a blood-borne wide spread infection.
- Blood clots in veins and lungs –Albeit extremely rare, it may be possible to develop a blood clot

associated with this treatment that goes (embolizes) to the heart and/or lungs.

- Allergic reactions – Although uncommon, I could possibly develop an allergic reaction to medicines applied to the treated area and that I could possibly develop an allergic reaction to any medications that may be prescribed for me.
- Hemorrhage and bruising – Bruising in the treated area is possible, especially if, within the last ten (10) days, I have taken aspirin or aspirin-containing products, or other medications that “thin” the blood.
- Recurrence of the lesion – I may not experience permanent results even with multiple treatments.
- Painful or unattractive scarring – Scarring is a rare complication of laser assisted treatment, but scarring is possible because the skin surface is disrupted by the laser. To minimize the chances of scarring, it is most important that I follow all postoperative instructions carefully.
- Discomfort and pain – Some discomfort will be experienced during and after the laser treatment. I give my permission for the administration of topical and/or local injection of anesthesia when and if deemed appropriate.
- Pigment changes (skin color) – During the healing process, the treated area may become either lighter or darker in color than the surrounding skin. This is usually temporary, but on a rare occasion, it may be permanent.
- Poor healing – The resultant open wound may require more than the usual one to three weeks to heal.
- Blindness and eye damage – The laser, without protective eyewear, may cause visual loss ***including blindness. It is important to keep these shields on at all times during the*** procedure and that I should keep my eyes closed in order to protect my eyes from accidental laser exposure.

I understand and acknowledge that I have been informed by means of visual aids, as well as individual discussion, that multiple treatments are often required to cause long-term results and that some patients have no results even with multiple treatments. The usual number of treatments required is two to three, but more treatments may be required.

I have been given an opportunity to ask questions about my condition, alternate forms of anesthesia and treatment, the procedure to be used, and the risks and hazards involved, and I believe that I have sufficient information to give the informed consent. By signing below, I certify that I have read and fully understand the contents of this document and that I have received and understand all of the disclosures referred to herein. I certify that I am a competent adult of at least 18 years of age, or that if I am a minor under the age of 18, I understand that the consent of my parent/legal guardian having legal custody will also be required before treatment.
